FARM FOR SALE

The Soldier Settlement Board of Canada offers for sale
by public tender—

The South West Quarter of Section Three (3), in
Township Twenty-six (26), Range One (1), and the North
East Quarter of Section Thirty-four (34), in Township
Twenty-five (25), Range (1), West of the Fourth Meridian,
as described and subject to the exceptions and reservations
contained in the existing Certificate of Title.

Terms of sale are not less than 20 per cent of the purchase
price in cash on acceptance of the tender, and the balance in
ten (10) equal instalments, with interest at 6 per cent per
annum on the amortization plan.

Each tender must be accompanied by an accepted cheque
for \$100.00. If tender is accepted, this sum will be credited to
the purchase price of the land. If tender is not accepted the
money will be returned to the tenderer.

Tenders will be opened at CALGARY, Alberta, on
FRIDAY, September 13th, 1929.

The highest or any tender, not necessarily accepted. If
the land is not sold on the date above mentioned, the Board
will be prepared to receive offers to purchase until such time
as it is finally disposed of.

Tenders should be in plain envelopes marked "Tender for
the purchase of the S.W. 1-3-25-1, W. 4th and the N.E. 1-34-25-1,
W. 4th Meridian."

Address tenders and enquiries to—

THE SOLDIER SETTLEMENT BOARD
Southern Building,
CALGARY, Alberta.

Fire at Johnson's Farm

Splendid Work By Fire Brigade
And Volunteer Fire Fighters
Saves Fine Barn

Shortly after 4 o'clock on Fri-
day afternoon fire broke out in
one of the stacks at Mr. Harvey
Johnson's place and quickly
spreading to other stacks in the
yard, the place soon became a
roaring inferno, and the barn
exposed to the blaze on the west
and north sides was seriously
threatened.

W. D. Morrell, who had been
delivering oil at Walker's farm
(north of the town elevator),
was just ready to return to
town when he noticed the
blaze at Johnson's. Mrs. Morrell
and one of the children who
had accompanied him, got the
ride of their lives when he head-
ed for the fire hall to give the
alarm. A barb-wire gate in his
way meant nothing to Bill, he
just stepped on the accelerator
and put his truck through it. A
wild drive past the elevators,
across the tracks, along Rail-
road Avenue and up Main Street
brought him to the fire hall in
record time and his first clang
on bell stirred the village into
instant action. Within half a
minute he was back in the
truck again towing the chemi-
cal engine out to the fire, with
over a dozen fire-fighters
clinging to his wildly swaying
truck, while many cars picked
up loads and dashed off to the
scene of the blaze.

When the outfit arrived in
the yard the team on the
north side of the barn was on
the bus, a stream was soon
being played on it and by valiant
efforts in face of terrific
heat, the fire fighters succeeded
in getting this part of the fire
under control. Splendid work
was done by Angus Blue, Chas.
P. Snyder, Ross Acheson, W. R.
Cutlan, W. D. Morrell, Dick
Hosfeld, Chas. S. Wright and
many others in fighting the
blaze and a bucket brigade com-
posed of Edmund Todd, Dick
Desnoes and Harvey Hansen,
who were later joined by Vic
Thygesen, did fine work on the
roof of the lean-to.

When the barn was consider-
ed out of danger, efforts were
concentrated on toppling the
burning stacks and spreading
them so they would burn out
more rapidly and reduce the
hazard in case of wind, and
much good work was done. By
7:30 in the evening, the danger
was considered over and only a
small number remained to
guard against any outbreak.

Refreshments served to the
fire fighters about 6 o'clock were
very much appreciated.

Mr. Johnson lost about sixty
tons of feed, including over four
thousand old shaves and with
the damage to the barn, less than
his loss will be around \$1000,
partially covered by insurance.

At the time the fire started,
no one was home, the family
being in the field watching har-
vest operations, and it can only

CHURCH NOTICES

All Saint's Anglican Church
Oyen, Alta., Sept. 8
10th Sunday After Trinity
Sunday School 1.45 p.m.
Evening and Sermon 7.30 p.m.
Rev. Leonard C. Scott.

Oyen United Church
Service Next Sunday
Sunday School at 2 p.m.
Worship and Sermon 7.30 p.m.
Theme—"Enlightenment for
the Eyes of the Heart."
Rev. H. C. Woods.

At The Fuego Well

The hole at the Fuego well is
being carried down steadily,
and is now near the 3050 foot
mark. The formation in which
the drill is pounding, according
to officials of the company, is
very satisfactory and gas and
oil are in evidence in increasing
quantities. Greater interest
than ever is being taken in this
project, not only locally but
all over the country. There is
a steady demand for shares.

From 96 In The Shade To Freezing

After sweating in intense
heat during the latter part of
last week, the weather turned
cooler Sunday, with a light
drizzling shower falling Sun-
day evening. Monday was cool
and showery with light drizzles
following through the night
and Tuesday morning. The
weather cleared Tuesday after-
noon with a decided drop in
temperature in the evening,
freezing point being reached
about 10 o'clock. Reports as to
amount of frost vary from 1 to
6 degrees for the district.

School Fair, September 13

Schools participating in the
Oyen school fair, which will be
held on Friday, September 13,
are asked to note particularly:
that the regulation regarding
school work not being accepted
after 10:30 a.m. on the morning
of the fair, refers to perishable
articles such as vegetables, flow-
ers, grains, cooking etc. and
livestock.

Building Operations Commenced On New United Church

Excavating for the footings
of the new United Church was
completed this morning and
the contractors, Messrs Stephen-
son and Anderson are now pre-
paring forms and will be pour-
ing concrete to-morrow.

Donations to the building
fund are coming in satisfac-
torily. Those who have not al-
ready given their subscriptions
to the treasurer are asked to do
so as early date.

Councillors, Your Ear!

Youngster to his mother go-
ing out to a bridge party—"Gee
whiz, that is something the
council should stop." "What is
it the council should stop,
sonny?" "Why, these 'Bridges',
and another thing they should
attend to, is these 'Whisks'."

he surmised that it was caused
by spontaneous combustion.
Those on hand before the ar-
rival of the fire fighting appar-
atus worked hard carry-
ing water to save the barn, but
had it not been for Morrell's
timely alarm and his fast trip
out with the chemical engine
and band of fire fighters, the
building would have been de-
stroyed.

Jack Siddle, who delivered
the first tank of water, was
thrown from one of his horses
when he attempted to ride it
into town for a second tank.
Although badly shaken he
pluckily ran behind the team
into town and brought his sec-
ond tank out in extra fast time.

Dairying In Western Canada

Survey Being Made In Saskatchewan To Study Production Costs

A dairy survey of the province of Saskatchewan is being undertaken under the auspices of the provincial government. The problem set is to determine the cost of producing milk and butter fat on Saskatchewan farms, both on those where dairying is a major activity, producing milk for the city trade, and those where it is conducted as a side line, and cream is sold for butter-making purposes, or dairy butter is manufactured on the farm.

It is generally believed that a study of production costs will show up strongly different degrees of efficiency, and will encourage farmers who have not made dairying pay in the past to attempt it with somewhat improved methods, or with better foundation stock for the future.

Dairying, and other branches of raised farming are frequently recommended to farmers as the best method against disaster when short grain crops occur. These familiar, however, with farm practices, point out that in years of drought, dairying may be a burden instead of a blessing, and that some very large losses have occurred in the past by losses of stock which have been forced to eat their stock owing to lack of available feed, or have tried to carry their stock along on the stubble, and that in years when grain prices are low, or where grain has been lowered in grade by rust or frost, live stock often give a side return, return for grain fed than the market will give.

The increasing tendency toward mechanization of farms, results in a trend toward larger farm units, the employment of less labor, and to a considerable extent, the reduction of activities outside of straight grain-growing. This has been part of the cause for the somewhat reduced dairy production of Saskatchewan during the past two years. To what extent it is possible or desirable to interrupt this trend, and to what extent, and in what districts farmers should be encouraged to diversify their efforts, is a problem which has by no means been entirely settled. The information which the dairy survey will reveal will probably lead to a much clearer idea on the subject.—The Financial Post.

Tourist Traffic Increasing

First Six Months Showed Larger Number of Cars Came Through R.C. Ports

Approximately 6,000 more tourists entered Canada from the United States via British Columbia ports during the first six months of 1929, than during the corresponding period of 1928, according to the Report Commissioner, of Vancouver. His report shows that the increased number of cars carried 20,000 more passengers this month than during the first six months of 1928.

Beauty Of Emerald Lake

The beauty of Emerald Lake in Yoho National Park, British Columbia, lies in the peculiar coloring of its waters and the charm of its thickly wooded shores. Its waters are of a prevailing emerald in color, and in their crystalline depths it is said one may count twenty shades of green at one time but never one of blue. A complete border of jade green forest adds to the loveliness of the scene.

Fish Cannery For Manitoba

According to the "Canadian Fisherman," a fish cannery is being proposed to pack the fish products of the Manitoba lakes. It is also reported that efforts are to be made to utilize the large available quantity of coarse fish and fish offal from the Manitoba fisheries in fertilizer and stock feed manufacture.

San Marino, a tiny country on the eastern slope of the Apennines, about 40 miles southeast of Ravenna, Italy is regarded as the widest republic in the world.

Ambulance man: "His ribs are broken."

Doctor: "Only his ribs?" Ambulance man: "No, his radiator, his front brake, and his back wheel as well."—H. 490, Florence.

RED CROSS AND THE IMMIGRANTS

The strangers within the gates offer their first impression of Canadian hospitality in the welcome prepared for them by the Red Cross Society, at the ports of Quebec, St. John and Halifax. Here, beautifully equipped nurseries provide for weary women and travel-stained children, a haven of rest.

The kindly services of a friendly staff of ten to the adults and milk and disinfectants to the little ones, expressed in a simple yet gracious manner, Canada's welcome to her future citizens.

Advocates Exercise For Eyes

Would Be Of Great Benefit Says Member Of Mayo Clinic

Exercise for the eyes was advocated by Dr. Charles Sheard, chief of ophthalmology at the Mayo Clinic, Rochester, Minn., in an interview recently. The doctor said "setting-up exercises" in the morning would benefit the eyes as much as they do the body, "eye-rolling" being especially recommended, that is, rolling eyes sideways and upward.

Dr. Sheard said: "The eyes are as busy as any part of the body and need exercise. Like other parts, also, they can adapt themselves to the needs of the modern world." He said the "movies" were not injurious to the eyes. The motor car, though brings with it a strain on the eyes which was not known in the old days of the horse. "Driving a car is a continual strain on the eyes," the doctor said, "but people are less tiring now than they used to be, and there is no appreciable harm. The short-sighted driver is often safer than the man who takes long chances."

Result Of Organization

Orkney Islands Have Profited Greatly Through Co-Operative Marketing

An excellent example of what can be accomplished by organization comes from the Orkney Islands. Last year, from that northern outpost of the Empire, 2,000,000 dozens of eggs were exported, the value being more than twice the total valuation of the country. This represents an increase of more than half a million eggs compared with the previous year. In most markets associated with farming interest, the people of these remote islands are well abreast of the times. For a number of years past they have profited much through the co-operative marketing of their produce.

Birds are rarely sighted by airplanes flying at an altitude of 3,000 feet or over.

Waste cotton is utilized in making a high grade of paper.

The Red Cross nurse, register the names of all immigrants, and by means of an admirable system of follow-up, the settlers are put in touch with their spiritual Red Cross in the province of their adoption. Thus the peace time program of Red Cross friendships and health service is begun.

Grateful letters of appreciation from settlers in the far flung outposts, give proof that there is no greater act of courtesy to a New Canadian than that of the hearty hospitality for which the Seaport Red Cross Nurseries are famous.

Phonicians Were Pioneers

First People Known To History To Use Artificial Teeth

The first false teeth known to history were worn by a woman of Silesia, in Phoenicia, about 300 B.C., according to Dr. Roy L. Moody, well known anatomist. The Phoenician woman's jaw, with the false teeth, is now preserved in the Louvre, in Paris. The two right incisors are represented by artificial teeth held in place and bound to each other by gold wire. The wire has been drawn through careful perforations in the artificial teeth.

Although the Egyptians pioneered in treatment of many diseases conditions of the body, this sort of dental replacement apparently was never duplicated by Egyptian physicians. Thousands of mummies, representing seven thousand years of life in Egypt, have been examined but no clear evidence of such repair work has ever been found. It appears that we not only owe our alphabet and numerous geographic discoveries to the restless, inquiring minds of the Phoenicians, Dr. Moody points out, but also we are indebted to them for this entrance into prosthetics, which is a particularly valuable field of dentistry.

Manitoba's Gold Production

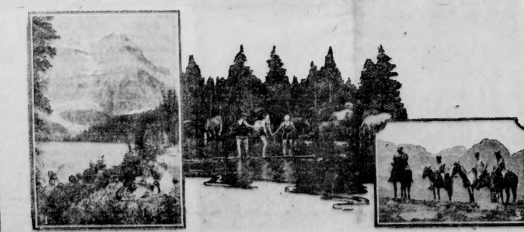

Figures dealing with gold production in Manitoba during 1928, just published by the Dominion Bureau of Statistics, show a total nearly double that of the entire production of the eleven preceding years. The only thing worth considering, he has really lost his soul.

World's Grain Exhibition

More than \$250,000 will be awarded as prizes at the world's grain exhibition and conference to be held in Regina in 1932. If the present plans and classification prize list are adhered to, these were drawn up at a meeting of the executive recently. There is an appropriation of \$70,000 to prize wheat.

During the present year there are only 84 days on which the banks are open all over the world.

Trail Riders in Rockies

1—Resting at the foot of Mount Banff on Shadow Lake, a spot seldom visited in the Rockies. 2—Hardy and sturdy looking in a glacial lake from which the trail riders had earlier taken some score of fine trout for their breakfast. 3—Hiding on a shale over seven thousand feet high.

Over a hundred members of the Order of Trail Riders took the four day trip from Banff to Castle Mountain Bungalow Camp, via Healey Creek, Shadow Lake and the Twin Lakes early in August. Besides the glorious scenery, the exhilarating air and the life in the open, the trail riders enjoyed some fine fishing and some of the harder ones even took in a little gliding and lake bathing. Some of the lakes visited have been seldom seen by tourists in the Canadian Rockies and the trail riders were accordingly pioneers in their travels. The riders came from all parts of Canada and the United States for this annual outing.

Making Correct Map

Experts Are Working On Accurate Picture Of World

So few places remain unexplored that most people gave for granted that modern maps give an accurate picture of the world. Yet nearly everyone has a distorted idea of the sizes of most countries and their geographical relation to each other. The blame lies in the commonly accepted map of the world which children still study. This map was designed by Gerardus Mercator in 1569, and is known as the Mercator projection, or system of showing the world on a flat surface. It gives a grossly inaccurate picture, writes Karl Vought, in Popular Science Monthly for September.

For instance, the United States appears nearly twice as large as Brazil, although in reality it is smaller. North America is shown as about twice as large as South America, though they are approximately equal in size. Greenland is shown as larger than Australia, and yet Australia is thought to be three times as large as Greenland!

The trouble with the Mercator map is that it was designed as a chart for sailors rather than as an accurate picture of the world.

As a result of five years' work, experts of the U.S. Department of Commerce have just completed a correctly-proportioned flat map of true areas and distances. Every square inch on the new map stands for exactly the same number of square miles as any other square inch. Distances along the lines parallel to the equator are accurate and true to scale. So also are distances on each vertical meridian. But except for the equator, all lines of latitude are curved, and of a certain sort, five circles would be delivered below. The dark young man drew something from his pocket, and he took the rejected work, and he took it hastily at the point indicated.

Amusements Secondary

Work Is Only Justification For Existence Of Man

Work is really as much a necessity to a man's well being as eating and sleeping. The neglect of work has also its penalty—deterioration of character. Work is too often regarded in the light of a punishment, an evil which has to be endured, unless which can be avoided. Work is a supreme good. It is the most lasting pleasure. The knowledge of work well done "makes music at midnight," Carlyle, speaking of industry, says: "Work is the cure for all the maladies and miseries of man—bonest work, which you intend getting done."

The amusements of life can never be regarded as anything more than secondary or even tertiary. Work is the real fun, and it is the only justification for one's existence. When a person has come to feel that work is wearying, and idle amusement the only thing worth considering, he has really lost his soul.

More than \$250,000 will be awarded as prizes at the world's grain exhibition and conference to be held in Regina in 1932. If the present plans and classification prize list are adhered to, these were drawn up at a meeting of the executive recently. There is an appropriation of \$70,000 to prize wheat.

During the present year there are only 84 days on which the banks are open all over the world.

As Big as Himself

Of course the little fellow in the picture trying to hold this ten-pound seedling, did not do much to impress catching him. It took his father 15 minutes to lend this fighter which was taken with a black gun on the Stamp River, Vancouver Island, on a July morning. July, August and September are the best months, and the river is located in the Alberni District, on the west coast of Vancouver Island, about 140 miles from Victoria, easily reachable by Canadian Pacific Railway.

Newest Automatic Salesman

One Machine Makes and Sells Hot Cakes With Syrup

A dark young man with a restless eye sauntered into a store at Forty-second and Broadway, New York. Sliding up to a change machine he was informed by the directions that he dropped a quarter in a certain slot, five nickels should be delivered below. The dark young man drew something from his pocket, and he took the rejected work, and he took it hastily at the point indicated.

The change machine accepted the coin with a non-committal click. Instead of disgorging five nickels, it dropped an iron washer into the delivery cup, and from within the cabinet a stern voice spoke: "Please use good coins only!"

For a moment the young man regarded the machine with sagging lips, then he took the rejected washer and beat a hasty retreat. His small-time fraud was exposed by the latest machine to join the ranks of the army of robots now serving the American public. Writer Frederic Tuckman of the September Popular Science Monthly.

Increased demand for automatic salesmen has brought 250 manufacturers into the market. They produce about 400 different machines, each with its own vocabulary, containing themselves with a hearty "Thank you." Now the thanks is often followed by the trade slogan of the product sold. One machine will place its hot pie in 10,000 cases before wear makes necessary a fresh reheat.

A robot that rivals the blonde lady who stands in the restaurant window and darts fly boy cakes has been produced by one inventor. The automatic which takes orders, electrically and hardened, has a magazine which will accept enough dough for a hundred servings. A quarter dropped into the slot will cause the machine to turn out a whole cake, and starts a fascinating series of operations. One by one the portions of better drop on the hot plate. When one side is brown an automatic flipper turns the cake. The machine supplies syrup.

Even gasoline is now sold by machine. The slot takes fifty cents. An adjustment allows the owner to set the amount according to the day's price. At one of the amusement beaches near New York, an automatic store sells fifty different commodities by means of mechanical robots. Broadway has a "Soda-mat" in which eleven machines sell loganberry juice, root beer, orange and the like.

A Good Suggestion

Captain Robert Dollar, of San Francisco, said at the Willard to Washington correspondent, spokesman of a bumptious politician's defeat: "He was taken down nearly, like the condescender in the anecdote. This said to a pretty girl: 'You know Maud Travers? Well, the poor thing's all been up over me. I like her, of course, but I could never love her—oh, no, never. I'm very sorry for her, though, and I want to put an end to the situation without breaking the poor creature's heart. Can you suggest any plan?' 'Do you call on Maud often?' asked the pretty girl. 'No, not often.' 'Call often,' said the pretty girl.

When a woman's teeth chatter they usurp her tongue's prerogative.

Growing Pure Seed Grain

Careful and Pains-taking Work In Growing Seed Grain

No good seed grower can grow grain without working over his fields and seed plots, to remove the impurities of "rogues" which he may find in the growing grain. This removing of impurities is called "roguing."

At the present time it is practically an impossibility to grow pure seed grain, without carefully and painstakingly going over every foot of the area set aside for seed, and picking out the odd headed heads from the bald main crop. Even where the seed crop is very good and no really outstanding impurities can be noticed, the careful grower goes over the plots to remove the plants which are not quite up to the high standard set for good seed.

"The easiest way to 'rogue' a seed plot is to walk down the seven-inch path between the drills, and carefully scrutinize all the heads which are visible in each of the three or four drills on each side of the path being followed. By walking slowly and carefully, and counting the plants in the six or seven rows as you pass along, all impurities or abnormalities can be quickly detected, and the off-type plants can then be pulled up by the roots. If the plot is particularly bad, turn about and come back on the same row, and then it is way a number of off-heads may be found on the return trip.

At seedling time the seeder is often run back and forth over the seed plot, leaving a 14-inch path down, which is easy to travel at all times for roguing purposes. However, if the fields are dirty with weeds, it is often a bad practice to leave such a path to harbor and produce weeds.

After carefully going over the seed plot after the plants have fully headed, and once again just before the grain ripens, most of the impurities will be easily spotted and removed before harvest.

The seed plots which are thus carefully 'rogued' in the manner explained above, and which are pure seed, and subsequent crops should be pure and cause less trouble at harvest time than the old, uncareful seed supply.—By J. C. Fraser, Ottawa.

A Versatile Animal

Dairy Cow With Aid Of Cheese Produces a Number Of Things

Jack Stevenson of his truly bovine acquaintance: "The friendly cow, all red and white, I love with all my heart; she gives me cream with all her might, to eat with apple tart." She also gives the Federal Milk Research Laboratory a good spooning, cut hanks, dominos, dice, combs, cigar-holders, pipe-stems, waterproof glue, radio parts, leather polish, paint, paper siding and appliance frames. That is, she yields all those products with the aid of the chemist, who takes a few drops of milk or whey, does a few things to it and has a nice batch of casing. It is this substance which can be made into hardened, and mixed with other materials to make the various products announced by the laboratories.

Such resourcefulness in a humble domestic animal is to be highly commended, for it makes the ingenuity of the Swiss Family Robinson appear dull and obvious. With the family cow and a few test tubes, future cowboys on desert isles should lack for nothing.—St. Louis Post-Dispatch.

Our Clay-Working Industries

The clay-working industries in Canada are engaged chiefly in the manufacture of heavy clay products—bricks, structural ware, drainage tiles, and salt-glazed ware such as sewer pipe. Surface clays of glacial origin, which are widespread over the country, are used at most of the plants; but shales from several geological horizons are also employed to a considerable extent.

Chinese people have been moving into Manchuria at the rate of about a million a year.

Doctor: "Put this thermometer under your wife's tongue and make her keep her mouth closed for two minutes." Husband: "Haven't you a thermometer that takes an hour to set?"—Prager Presse, Prague.

Determining Period of the Year Most Important For Land To Receive Normal Precipitation

Opinion differs as to the period of the year in which it is most important for the land to receive normal precipitation in order that moisture reserves may be adequate for the growing crops. Recently a detailed study has been made of 13 representative districts over the prairie during the last 12 years, and certain conclusions arrived at on the basis of these 156 stations.

Out of 32 occasions, when Fall and Winter precipitation was normal or above normal, in 73 instances fall to heavy stands resulted irrespective of the moisture condition following after, which in 42 cases was below normal. Fall and winter deficiency was made up by above normal spring and summer rains in only 28 out of 74 occasions.

On the other hand, on the 47 occasions when below normal spring and summer rainfall was preceded by above normal fall and winter precipitation, the resulting crops were fair to heavy.

The evidence would seem to point to the fact that, while fall and winter precipitation gives no guarantee of a good crop, still it is a most important factor and makes probable a good yield.

A examination of last fall and winter precipitation records reveal that there was need of a rainfall, this spring, considerably above normal if crop prospects were to be regarded in any way as favorable. From September, 1928, to March, 1929, the average rain and snowfall was appreciably less than half normal, not a single weather reporting district receiving its quota.

Coupled with unusually moist moisture came an unusually dry spring and summer, when April was the only month when even approached normal, while the two important months, June and July, were two-thirds and a little over one-half of normal respectively.

As for the present crop is concerned, it required an unusually large amount of spring and summer rainfall which did not come. The results of this lack are now evident.

Advantage Of Rough Seas

There is nothing like a sea voyage—that is a good rough and tumble passage—to determine whether or not you are crazy. This was a declaration of broad human interest recently by Dr. Page, Chief Medical Inspector of Immigration.

Dr. Page points to experience to justify his opinion. This season a dozen immigrants who were apparently normal on examination and underwent the medical examination before they did so, were turned back to this side because of displaying mental derangement during or in sequence to the voyage.

Dr. Page casts no reflection on the examination overseas and the efficiency of the staff there, but says that often a rough sea voyage will upset the mental equilibrium and leave it upset. It is a fine test, he said, and he is inclined to recommend it to those who are not quite sure of themselves.

Why She Was Satisfied

It was necessary for taxation purposes to decide on which side of the Canadian and United States border a farm which an elderly lady had just purchased, actually lay. Surveyors finally announced that the farm was just on the American side of the border. The lady smiled with relief. "I'm so glad to know that," she said. "I've heard that winters in Canada are often terribly severe."

Japan's demands for phonograph records lean largely toward the work of great composers, whereas in China nine-tenths of the records are traditional Chinese tunes.

Canada's North Country

Railways Laid In Wilderness Justifying Optimism Of Pioneers

Running north between North Bay and Cochrane and thence towards Winnipeg, one looks from an observation car to see marsh and rock and the burnt trunks of trees standing in stark ugliness against the sky. Examining it all, one marvels at the courage of the men who laid steel along such wastes, at the fortitude of the men who first went into such a wilderness. Yet this country, ugly and so seemingly useless, promises to become one of the richest portions of Canada. The story of what it has yielded and promises to yield in minerals, in gold and silver, copper and nickel, is known to all. And now comes word of the discovery of rich coal deposits in the Abitibi River, in the Blackmouth Rapids area north of Cochrane. Coal is promised to be added to the rest of this province's riches.

Providence, truly, has been good to Canada. We have one of the greatest granaries of the world, a diversified climate that permits us to raise most anything that we need; some of the world's greatest forests; seas and lakes and rivers that thrive with fish; mines that yield fabulous wealth; mighty water powers; millions of acres of rich soil. And we are only upon the threshold of development. The great north country, ignored until recent years, promises to open up possibilities undreamed of by our most sanguine optimists less than a decade ago. Ottawa Journal.

Providence, truly, has been good to Canada. We have one of the greatest granaries of the world, a diversified climate that permits us to raise most anything that we need; some of the world's greatest forests; seas and lakes and rivers that thrive with fish; mines that yield fabulous wealth; mighty water powers; millions of acres of rich soil. And we are only upon the threshold of development. The great north country, ignored until recent years, promises to open up possibilities undreamed of by our most sanguine optimists less than a decade ago. Ottawa Journal.

Winnipeg Newspaper Union

As a result of the present crop is concerned, it required an unusually large amount of spring and summer rainfall which did not come. The results of this lack are now evident.

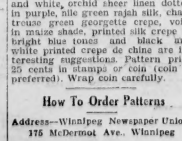

There is nothing like a sea voyage—that is a good rough and tumble passage—to determine whether or not you are crazy. This was a declaration of broad human interest recently by Dr. Page, Chief Medical Inspector of Immigration.

Dr. Page points to experience to justify his opinion. This season a dozen immigrants who were apparently normal on examination and underwent the medical examination before they did so, were turned back to this side because of displaying mental derangement during or in sequence to the voyage.

Dr. Page casts no reflection on the examination overseas and the efficiency of the staff there, but says that often a rough sea voyage will upset the mental equilibrium and leave it upset. It is a fine test, he said, and he is inclined to recommend it to those who are not quite sure of themselves.

It was necessary for taxation purposes to decide on which side of the Canadian and United States border a farm which an elderly lady had just purchased, actually lay. Surveyors finally announced that the farm was just on the American side of the border. The lady smiled with relief. "I'm so glad to know that," she said. "I've heard that winters in Canada are often terribly severe."

Japan's demands for phonograph records lean largely toward the work of great composers, whereas in China nine-tenths of the records are traditional Chinese tunes.

Could Learn From Canada

Australia Would Follow Example Of Dominion In Dealing With Industry

The Bulletin, Sydney, Australia, says:—Canada doesn't go in for compulsory trade-unions or basic-wage commissions, or arbitration courts, or anything like that. It believes that the less Government meddling in industry the better for both employers and employees; and as warrant for its belief it has the Government statistics, recent wage increases in many trades, low unemployment returns, and comparative freedom from strikes. In 1927 the number of disputes was 70, the number of workmen involved 22,083, and the number of working days lost 165,258. Australia, with its expensive apparatus of industrial tribunals had 441 strikes, 260,757 involved employees, and 2,111,081 lost working days in that same year. In short Canada is beating us badly, and we ought to be proud to let Canada beat us badly by thought not too proud to learn from its example.

To Have New Industry

Western Foundries, Ltd., Building Factory At Lethbridge

The Western Foundries, Ltd., with a capital of \$100,000, has purchased four acres of land in the Canadian Pacific Railway industrial section at Lethbridge. Work has already commenced on the buildings. The company proposes to manufacture heavy machinery, mining and oil drilling machinery, cast pipes, cast iron water pipes, and brass, aluminum and bronze castings. It is understood that supplies of pig iron will come from the Pacific coast, coke from Michel, and moulding sand from the Lethbridge district.

Air Travel Increasing

For the first time since the daily air service between Montreal and New York was inaugurated on October 1, last year, a second section set out recently from St. Hubert Airport. The new section is a small plane, which is a most convenient mode of obtaining accommodation in the regular mail plane. A total of nine persons, six male and three female, embarked aboard the two Fairchild machines for Albany and New York.

Arsenic has been found in appreciable quantities in all organs of the human body.

Welcome Bisley Victor Home

Lieut.-Col. R. M. Blair, champion rifle shot of the Empire, welcomes home on board Canadian Pacific steamer "Duchess of York," by Dr. A. M. Wayne, immigration health inspector. The trophies won by Colonel Blair are pictured below and are from left to right: The most coveted shooting trophy in the British Empire—the Gold Medal awarded to the King's Prize winner; the Grand Aggregate Gold Cross also won by Col. Blair, and the National Rifle Gold Badge. He was also presented with a much-prized autograph photograph of His Majesty King George V.

CHARLES FORESTER

Formerly superintendent of the Canadian National Railways at London, Ontario, who was appointed General Superintendent of the Saskatchewan District, with headquarters in Saskatoon, vice R. T. Chapell transferred.

One Cause Of Road Accidents

Passing Other Cars At High Speed Is Dangerous

All automobile road accidents, like other accidents, are needless, in the sense that they can be avoided. There is always some cause for an accident, and it is only as we guard against the cause that accidents can be eliminated or, at least, reduced. The Montreal Gazette stresses what seems to be the cause for a great many road accidents within recent months as that of overtaking and passing other cars at too fast a pace, and gives numerous instances of fatal accidents which occurred in this way.

Drivers of automobiles need to be in full control of their cars all the time and in all circumstances. There should be no passing of other autos at high speed, especially when the highway is more too wide, or where there are deep ditches on either side. The drivers who take risks in this respect endanger their own lives and the lives of others. They are acting criminally and are the cause of many needless deaths that are being registered. —Morse Jaw Times.

McGinty—I've a terrible corn on the bottom of my foot.
Pat—That's a fable place to have it. Nobody can step on it but you.

Canadian Poultry Pool Faces Unusual Situation This Year Owing To Over-Production

Grading Of Market Hogs

Department Of Agriculture, Ottawa, Has Issued New Hand Book

The grading of hogs has gone through several stages, each change bringing the grading system into more nearly perfect relationship with the conditions and needs of the industry. The grades, which are now nine in number, and designated as Select Bacon, Bacon, Butchers, Heavies, Extra Heavies, Lights and Feeders, Roughs, Sows, and Stags, are clearly defined in a new pamphlet, No. 40, of the Department of Agriculture, at Ottawa. The grading of the hogs is done by official graders at stock yards, abattoirs, and at such other points as may be found convenient from time to time. New weighing grading points or centers may be established on the recommendation of a provincial swine breeders' or provincial producers' association, who find that the centres already in operation do not adequately serve the territory in question. The utmost care has been taken by the Live Stock Branch of the Department of Agriculture, to meet every contingency that may reasonably be expected to give effect to proper grading, which at all times gives first consideration to the rights of hog raisers.

This pamphlet, numbered 40, which is a handbook on the bacon hog and hog grading, describes and gives the different breeds of hogs for bacon, and good, bad, and indifferent types of market hogs.

Provincial Turkey Show

Saskatchewan Exhibitors To Have Large Section At Winter Show

The management of the Saskatchewan exhibition has promised to provide facilities for a large turkey section at the time of the annual poultry raising show to be held there during the coming winter. This will constitute the provincial turkey show, explaining Professor R. K. Baker, at a meeting of the executive of the Saskatchewan Turkey Breeders' Association recently.

With regard to turkey exhibits at the World's Poultry Congress, in London, England, next year, the executive expressed willingness to co-operate with the poultry committees in the preparation of Saskatchewan exhibits.

Saskatchewan turkey exhibitors at the Toronto Royal this fall, it was announced, will have the advantage of the supervision of the well-known exhibitor, H. H. Stapleton, who will accompany his own birds to the show and who offered to look after the birds of other Saskatchewan exhibitors.

The executive drew up recommendations in regard to banding and inspection of turkeys for submission to the Department of Agriculture.

Taking Waterfowl Census

Canadian and United States Societies Are Co-Operating

The National Parks of Canada, the Department of the Interior, and the United States Biological Survey, are co-operating in the taking of monthly waterfowl censuses throughout Canada and the United States. These censuses are being taken in order to obtain information concerning the numbers, distribution, and migration of wild ducks, geese, swans and coots throughout both countries for the purpose of aiding in the administration of the Migratory Bird Convention Act.

Canada Will Exhibit

Canada's official participation in the six weeks' British Empire Trade Exhibition, to be held at Buenos Aires in the spring of 1931, has been announced by the Department of Trade and Commerce, Ottawa. The exhibition will be staged in the world famous Palermo Park where the Argentine, Rural Society annually stages its stock show.

Growing Turkish Tobacco

The latest experiment in Essex County, Ontario, the growing of Turkish cigarette tobacco, has been a success, early reports indicate. The Turkish plant is showing as good production in this county as in Macedonia, which has been the centre of Turkish leaf culture for centuries.

Upton, England, has erected a sign "Billposting prohibited in this village."

Woodpeckers rarely disfigure a healthy tree.

The Central Company of the

Canadian Poultry Pool, Limited, was faced with a situation unprecedented in the history of the Canadian egg industry in the early part of the present year, according to a review of the 1929 egg season, issued by the Saskatchewan Co-Operative Poultry Producers, Limited.

It appeared the season's production was considerably in advance of the consumptive requirements.

Toronto and Montreal had in the past provided a ready market for the greater percentage of the Western surplus, says the review, but this season's production was so increased in those provinces by local production, that an over-supply was soon apparent on the Montreal market. In consequence, the poultry producers had to look for other markets.

Great Britain, the only open market where provincial producers competed with the world, had been ruling approximately six cents under that of last year, it was stated.

In putting up eggs for export only the best grades can be packed, the statement warns. Eggs affected by heat cannot be exported. Undergrades, such as second, pulled extras and cracks, are not wanted in Great Britain.

During the last three months 10 per cent. of the eggs marketed in Western Canada by merchants have been under-grades, says the review, and consequently the poultry markets well supplied with high-grade eggs, a market had to be found for the large surplus of under-grades.

The situation was met during April, May and June, by breaking out into the market about 50 cars of undergrades, but once the requirements of frozen eggs were supplied under-grades had to go into immediate consumption. The result was over-supply, and it has not been possible to maintain prices.

The Pool has been consistently undersold by independent dealers who have been buying eggs from territory, getting them as low as 11 cents per dozen, as low as 11 cents per dozen.

The problem facing egg producers in Western Canada is to eliminate under-grades, and proper feeding rations. It is stated, care in banding and elimination of male birds from flocks would materially assist in solving this problem.

In view of the market situation, the orderly marketing of Pool merchants' eggs has obtained for the egg producers at least five cents more per dozen. Had merchants marketed through independent dealers the markets would have been completely demoralized.

It was believed that the poultry pools of Western Canada, through their central company, the Canadian Poultry Pool, Limited, have accomplished, this season, beneficial results which would have been utterly impossible under any other system.

Farm Loan Payments Soon

Plans For Scheme In Alberta Are Practically Completed

First payments under the Alberta Government Farm Loan Schemes will be made shortly. A large number of carefully selected applications are in the final stages, and loans that have been approved by the Edmonton Board, and the all-Canadian Board at Ottawa, are in the hands of the officials who are preparing the mortgage papers. When all legal points are disposed of the actual cash payments will be commenced.

Post (secretly to kindly)

"Mrs. Jones, I've said my poem called 'Ode to a Fair Lady.'"

"Have you? Well, you'd better be quick, for I've just written one called 'Ode to a Land Lady.'"

Tommy: Did you have influence as bad as I did? I had to stay away from school for three weeks.

John: I had it worse than that—I had it in the holidays.

"How did you find yourself after Osteren's party?"

"Oh, I just looked under the table and there I was."—Karlström's Oslo.

WORLD HAPPENINGS BRIEFLY TOLD

Flying officer W. P. Stewart, of the Royal Canadian Air Force, has been transferred from Jericho station to the Winnipeg service.

Fifteen persons were drowned when the Spanish steamer "Ogona" and the British tug "King's Cross" collided in the North Sea 30 miles off the Humber.

Warren Packard, 35-year-old held to the Packard millions, was killed when his private airplane crashed into a marker in a marsh near Grosse Pointe, Mich.

Information of the system of education for Japanese was discussed by representatives of public and private girls schools throughout the Empire in a recent three day conference at Tokyo.

A regular Arctic mail service between Fort McMurray, Alberta, and Akivik, Northwest Territories, via northern trading posts, will be inaugurated early in November, according to an announcement by Hon. Peter J. Vondt, postmaster-general.

A giant British army aeroplane manned by a crew of seven, crashed shortly after taking off from the Heligopolis aerodrome. Three of the aviators were killed, including the pilot, and the other four badly injured.

Mail taken off the Canadian Pacific steamer Montrose when she reached Rimouski recently was delivered at the addresses in Montreal during the morning, and in Toronto, Hamilton, London and Windsor during the afternoon.

Discovery of hematite, which would be of greatest importance to Canada's iron and steel industry, has been made on an island on Lake St. Joseph, by George Watts and R. A. Jennings, well-known prospectors. The ore body is said to be a mile wide and four miles long.

Another Problem Solved

Missionary Wants Use Razor Blades

What do you do with your old razor blades? Some people use them up for sharpening pencils, but there is a limit to the number of pencils sharpeners one requires. Others simply allow them to accumulate, to the annoyance of their women folk. But the blades which are a nuisance over here may be valuable in other lands. Some months ago a well-known missionary asked for used razor blades, which could not be disposed of otherwise, to be sent to him and he collected about 300,000 of them.

These blades are much prized by the African natives among whom this missionary works, and in one fifty-five football match recently it was found that they were a popular choice as prizes for the winning team.

A Youthful Steward

Fifteen-Year-Old Boy Is Serving On Graf Zeppelin

The youngest member of the Graf Zeppelin crew contemplates the world through serious eyes and believes he may grow up to be a good "airshipman." If he studies hard, his name is Ernst Fleibach, 15, and he shipped aboard the dirigible April 10 as a steward.

"I always wanted to be a steward," he said, "but now I may become an airshipman if I study."

Ernst was aboard the Graf Zeppelin last spring when damaged motors compelled Dr. Eckener to turn back. He is small, with an unusually serious face for a youngster.

New Breed Of Sheep
A new breed of sheep, specially adapted to live in a poor land where some breeds would be unable to subsist, and at the same time yielding a good 10-pound fleece of high quality wool, was exhibited by Leeds University at the recent Royal Show, held at Harrogate, England.

Conquer Mountain Peak

Party From New York Succeeded In Scaling Mount Alexander

After baffling Alpinists for many years, Mount Alexander has at last yielded. The great peak which stands near the Continental Divide, near Prince George, B.C., rises to more than 11,000 feet in altitude and is surrounded by what has hitherto been impenetrable ice. The first ascent was made by Dr. Andrew Gilmore, of New York, accompanied by Miss Helen Buck, Dr. Mary Gordin, Peter and Frank Waterman of the same city, and J. Waff and B. Comstock, of New Jersey.

They were in Jasper on their way home after the victory, all except Waff, who plans to attempt conquest of Mount Robson. The party, outfit by "Curly" Phillips, well-known Rocky Mountain guide, went out from Devons, through the smoky River country, and returned by way of the Main Divide. Among the other peaks they scaled were Resplendent and Chown.

More Powerful Motors For New Zeppelins

Would Ensure Trans-Oceanic Service

Regardful Of Weather
Dr. Lelander Kelp, director of the Hamburg American Line, who was a round trip passenger on the recent flight to the U.S. of the Graf Zeppelin, has stated that the steamship company would probably participate in financing the new Zeppelins.

These, he said, would be equipped with more powerful motors that would enable an average speed of nearly 80 miles an hour and be capable of providing regular trans-oceanic service regardless of weather. He anticipated that within a few years the fare between Germany and the U.S. would be reduced from \$2,000 to \$1,000.

Winnipeg Newspaper Union

For African Natives
The Winnipeg Newspaper Union, which has been organized by the African natives among whom this missionary works, and in one fifty-five football match recently it was found that they were a popular choice as prizes for the winning team.

What do you do with your old razor blades? Some people use them up for sharpening pencils, but there is a limit to the number of pencils sharpeners one requires. Of the persons reported as centenarians in the 1920 United States census, 1,561 were men and 2,706 were women.

The oil of tomato seeds, when extracted, is used in the manufacture of fine soap.

Sea Scouts being taught some secrets of Navigation by Chief Officer Poole of the Cunard Liner "Antonia."

Old Settler Deported

Violated U.S. Immigration Laws

John Donaldson Ross, Scottish dairy expert, who unwittingly violated the immigration law, was deported back to Scotland, on the liner Adriatic, despite all the efforts of the Anacostia Copper Co., his employers, to keep him here.

With him went his wife, born in Scotland, but reared in Canada and his two small daughters, one born in Canada and the other in the United States.

They arrived at Ellis Island on a long trip across the country from Montana, aboard a special train filled with other deportees, many of them recruited from penitentiaries and asylums. Ross came from Scotland to Canada eight years ago. There he married, and one daughter was born to the couple before they crossed into Montana.

Somebody informed immigration authorities that Ross was living in the United States in violation of immigration laws, and he and his family were ordered deported. Ross was not even permitted to back to Canada.

Historic Apartment Has Been Preserved

Room in London Where Y.M.C.A. Was Founded 85 Years Ago

It is just a little more than 85 years ago since Sir George Williams, then a humble shop assistant, founded the Young Men's Christian Association. He held the first meeting in his bedroom, which is now above a big drapery shop in St. Paul's Churchyard. The room and its table are preserved intact, for when rebuilding was in progress, the structure was lifted bodily from a lower floor to its present position. Pilgrims from every part of the globe visit the historic apartment to pay homage to its founder. The association later engaged a room in a coffee house for half a crown a week.

The Newest Skyscraper

New York Building Almost Equals Height Of A Mountain

It is extraordinary to reflect, writes "Looker On" in the London Daily Chronicle, that the new building to be erected for a bank in Wall Street, New York, will be only 160 feet short of the height of a mountain. With its 63 stories and its total height of 840 feet, this lofty structure should be one of the sights of the world. Britain's most elevated spire, that of Salisbury Cathedral (nearly 400 feet) quite pales into insignificance when compared to the distance from the ground of the crown of St. Paul's would have to be added to the height of Egypt's Great Pyramid before it equaled that of the New York giant.

Compass Needle Changes Direction

At Churchill, on Hudson Bay, the magnetic compass needle pointed 24 degrees west of north in 1700, one degree west in 1800, and 10 degrees east in 1900. In other words, during two centuries the needle changed its direction by 34 degrees.

Judge—Was the prisoner drunk or sober when you found him?

Officer—Drunk as a Judge.

Judge—You mean "drunk as a lord."

Officer—Yes, my lord.

Recipes For This Week

(By Betty Barclay)

CUSTARD SOUFFLE

3 tablespoons butter.
1 cup flour.
1 cup sugar.
1 cup scalded milk.
4 eggs.
1 teaspoon salt.
Melt butter, add flour, and gradually hot milk. Bring to boiling point and pour on to yolks of eggs beaten until thick and lemon-colored, mixed with sugar and salt. Cool. Fold in whites of eggs beaten stiff. Turn in to buttered dish and bake from 30 to 45 minutes in slow oven. Take from oven and serve at once. Serve with hard sauce, whipped or plain cream.

PEACH JAM

10 pounds peaches.
6 pounds sugar.
2 cups water.
Peaches that are too soft for canning may be used for this delicious jam or bread spread. Remove stones and cut in slices. Add to water in the preserving kettle. Cover and cook until thick and jelly-like, then pack in hot jar and seal.

Puzzled Father: "Why are you and your little sister always quarrelling?"

Small Boy: "I don't know, unless I take after you and she takes after mamma."

The most expensive animal to keep in captivity is the walrus. Its food bill is \$2,000 a year—a sum which would supply three elephants with food during the same period.

Barthold's Statue of Liberty was presented to the United States at Paris, July 4, 1884.

Moore—"Sandy has tremendous strength in his hands. How did he get that way?"

Sporer—"Using up the last quarter-life of his head pencils!"

Some of the earliest clocks had no dials. Only the hourly striking told the time.

The finest crown in the lot of Russian crown jewels is decked with 22,600 carats of diamonds.

Building In Copenhagen, Denmark, Is Shaped Like Gigantic Organ.

Scattered through the civilized world are churches of varying degrees of beauty—some small, some large and lofty, some with towering spires, others with beautiful domes, of exquisite glass windows—but perhaps the most unusual and original church in existence today is to be seen in Copenhagen.

To begin with, this church has been constructed almost as a memorial to N. F. S. Grundtvig, a preacher greatly admired and respected in Denmark; but it is the design of the building that is so attractive. The whole edifice is shaped like a gigantic organ outlined against the sky, and at first sight is almost overwhelming. One almost expects to hear music coming from the pipes that constitute the roof of this wonderful building, so natural is the effect.

Whilst on the subject of Copenhagen, another curious sight to be seen in the city is a tower that rises above the Church of Our Saviour. This remarkable tower is 285 feet high, and is built like a corkscrew round which are steps, on the outside, leading to the top. This tower was built in 1696, and has long been a special feature of the city.

Moore—"Sandy has tremendous strength in his hands. How did he get that way?"

Sporer—"Using up the last quarter-life of his head pencils!"

SUNDAY SCHOOL LESSON

SEPTEMBER 8

NEHEMIAH REBUILDING THE WALL OF JERUSALEM

Golden Text: "The people had a mind to work."—Nehemiah 4:3.

Lesson: Nehemiah 2:1 to 7:4.

Devotional Reading: Psalm 85:7-10.

Explanations and Comments.

Withstanding Ridicule, verses 1-6.

"What are these feeble Jews up to?" mockingly questioned Sanballat before his brethren and the army of Ammon. "Do they think they can do it all in a day? Do they expect to bring the stones to life out of these heaps of rubbish?"

"In every community there are crowds of people who have gone to the wall. They feel crushed and beaten. Now, the Church's mission is to do for this sinned mass what Nehemiah did for the rubbish-heaps of Jerusalem—to build out of them the city of God. The rubbish-heaps is God's raw material. A revival is His finished product. Let the Church get to work on these people as Nehemiah did on the Jews. It is equipped for no divine duty. She knows how to transform this mass of rubbish into a field of roses."—F. B. Mann.

Then Tobiah—joined in the ridicule. "That stone wall, which they are building," he said, "will be broken down if a fox tries to scale it." Their words were repeated to Nehemiah, and he appealed to God to judge between himself and his enemies.

"The real humor of the situation may be hard to beat, but the man ridiculed often finds his labor lightened if he can himself see the humorous side. The ridicule of Sanballat and Tobiah, however, came from fear and a realization of the power of Nehemiah. Nehemiah kept steadily at his work in face of ridicule. The trouble with the majority of the people is that the man who is righteously indignant against the sinners is too busy to feel his feet. The resentment of Nehemiah against the enemies of the Lord made him too busy to determine to finish the wall."

"To begin with, this church has been constructed almost as a memorial to N. F. S. Grundtvig, a preacher greatly admired and respected in Denmark; but it is the design of the building that is so attractive. The whole edifice is shaped like a gigantic organ outlined against the sky, and at first sight is almost overwhelming. Grundtvig, a preacher greatly admired and respected in Denmark; but it is the design of the building that is so attractive. The whole edifice is shaped like a gigantic organ outlined against the sky, and at first sight is almost overwhelming. One almost expects to hear music coming from the pipes that constitute the roof of this wonderful building, so natural is the effect.

Whilst on the subject of Copenhagen, another curious sight to be seen in the city is a tower that rises above the Church of Our Saviour. This remarkable tower is 285 feet high, and is built like a corkscrew round which are steps, on the outside, leading to the top. This tower was built in 1696, and has long been a special feature of the city.

Moore—"Sandy has tremendous strength in his hands. How did he get that way?"

Sporer—"Using up the last quarter-life of his head pencils!"

Some of the earliest clocks had no dials. Only the hourly striking told the time.

The finest crown in the lot of Russian crown jewels is decked with 22,600 carats of diamonds.

Building In Copenhagen, Denmark, Is Shaped Like Gigantic Organ.

Scattered through the civilized world are churches of varying degrees of beauty—some small, some large and lofty, some with towering spires, others with beautiful domes, of exquisite glass windows—but perhaps the most unusual and original church in existence today is to be seen in Copenhagen.

To begin with, this church has been constructed almost as a memorial to N. F. S. Grundtvig, a preacher greatly admired and respected in Denmark; but it is the design of the building that is so attractive. The whole edifice is shaped like a gigantic organ outlined against the sky, and at first sight is almost overwhelming. One almost expects to hear music coming from the pipes that constitute the roof of this wonderful building, so natural is the effect.

The Singing Fool

By HUBERT WAIN
Copyright, 1935, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, the singing waiter and song writer at Blackie Joe's New York night club, is discovered by Marcus, the famous Broadway revue producer. Molly, the ballad singer at Blackie's, who had trusted Al disinterestedly, makes up to him when she finds he is on the way to fame. They are married and Al, and John Perry, Al's best friend, become famous revue performers. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowledge, is left behind. Molly and John Perry, Al's best friend become interested in each other, but hide their feelings. One night Molly tells Al she is going to have a baby. He is overjoyed, but she is angry and resentful. Finally, when she will be spoiled. Al comforts her, telling her she will love the baby when she arrives.

CHAPTER XI

The months passed; the time approached for Molly's baby to be born. During that period she was kinder to Al, and more solicitous of his welfare. And, somehow, she and Al did not see John Perry so much. Perry seemed to be called out of the city a great deal of the time on business.

Al went about his work in a daze of happiness. At home was his lovely Molly, quiet-eyed, soft-spoken, patiently waiting. Undoubtedly the mystery of the approaching event had changed her for the better and as Al predicted, she too wanted the baby.

Then the night came when she was rushed off to the hospital, and Al paced the white corridors, sat down in the reception room, tried to read the dog-eared magazines he saw lying about, smoked countless cigarettes and—waited for the good word. Occasionally a white-robed nurse passed, giving him a sympathetic glance. Then the moment came when one of these nurses beckoned to him. He sprang forward.

"You may come now, Mr. Stone. The baby's born."

"How is it, what is it?"

"It's splendid! It's a boy."

"And how's Molly?"

"She's splendid, too."

Al tiptoed softly into the white room, behind the nurse. There was Molly, bolstered up slightly by pillows, paler than he had ever seen her before. She gave him a smile. And lying beside her was a small bundle, which suddenly gave off a high, piercing yell. Al stepped over, ever so cautiously, until he stood beside the bundle. Then he looked down into the wrinkled, red little face.

"Isn't he beautiful! He's a boy!"

While the nurse quickly slipped her hand over her mouth to hide a broad smile, Al leaned over gently and kissed her gently. He felt one of her arms go weakly about his neck.

"Are you happy?" she whispered.

"Oh, so happy! You're both of you just wonderful!"

"Yes! I'm happy too," murmured Molly, and suddenly she began to cry. Al was so happy, but he patted her lovely golden hair, and re-

peated, "There, there," and dried her eyes for her.

After years Al looked back on that night as the time when he and Molly were closest together, when she seemed to create a rare and delicate intimacy between them. But as the days passed she grew fretful and impatient to be back at her work. She mentioned Al constantly to whether he was sure Marcus would remember her as their favorite ballad singer. Each time the subject came Al nothing reiterated that she had nothing to fear. Why, wasn't she the best little heart-throb singer in the whole world? Surest thing she was! Molly was enraptured with the baby, but as the time approached for her reappearance on the stage her interest in Junior seemed to diminish. Her old feeling of self-protecting ambition returned to her.

Then came the night when she was to face the footlights again. Al, standing by the wings, saw her advance within the semi-circle of bright lights, raise her hands and sing. The wings, saw her usual friendly little stage smile. When she broke into song Al was staring with her from the wings, and the faintest hint of his encouraging murmur reached her.

Then his thoughts turned to Junior at home, Junior sleeping calmly in his crib, with one puppy dog thrust against her, and she thought, thought Al, Junior were to cry and the nurse didn't know what to do for him. It was all Al could do to keep from flinching from the theatre and driving some post haste.

But no, if he did that Molly would say he thought more of the baby than he did of her. She was saying that too frequently already. Al adored his child as he had never loved another human being, not even Molly. He would sit with the baby in his arms, crooning to it, singing to it, talking to it, by the hour.

Molly noticed his constant devotion to Junior, and while she had liked it and felt proud of it at first, she grew more critical as time went on.

"Al, you don't pay any attention to me since the baby came."

"Oh, I do so."

"No, you don't."

"But Molly, he's my baby. Any attention he gets is for you, too. Don't you see?"

Molly didn't see. She shook her head.

But Junior grew more and more healthy and without being the least bit aware that he was causing a bit of uneasiness between his parents. He had Al's happy-go-lucky, fun-loving nature and his greatest joy, as time went on, was to have his father sit up to him. So two years passed and Junior was able to strut about the apartment, although a bit unsteadily at times, and to go for the shortest of walks in the park.

Meanwhile, the fame and fortunes of Junior's father and mother grew to far greater proportions than they had assumed before his arrival. Al Stone had become Broadway's premier song writer, and as his fame grew he insisted that Molly Winton keep pace with it. She sang all his songs and he insisted that her photograph appear on every one of the music sheet covers and that her name appear in type twice as large as his own name.

Yet close observers would have seen that Molly wasn't happy. She had fame, money, a happy home, an adoring husband, and a beautiful child, yet something seemed to be missing. Frequently she was moody at home and sharp with Al. But Al loved her so and was so happy with Junior that he passed over these temperamental outbursts.

John Perry had called more frequently after Molly's recovery and return to the stage. He often dropped in at the sumptuously furnished Stone apartment and every so often he took Molly to dinner when Al was busy with a song that had to be finished in a hurry.

At Blackie Joe's place, just off the Village, Grace Farrell heard news of Al and Molly as it percolated down from Broadway. When she learned of Al's baby there was a little sharp pang in her heart for a moment, then she smiled and congratulated him to send him a congratulatory telegram. So Al and Molly had a baby! Grace wondered what it was like and longed to see it.

One day Grace was walking on the Avenue, window-shopping and dreaming, when she saw Molly's face at the window of a Blue Rolls-Royce. Just then the Avenue lights went red and the car drew up at the corner to wait for the traffic.

Now Grace saw a man sitting beside Molly—a stranger. Grace stopped, fascinated by the sight of the noble creature. Molly, superbly in delicately applied make-up, and a chic little Paris hat. Without thinking, Grace looked down at her own clothes. They were not as nice as they looked. They looked poor beside Molly's gorgeous raiment.

Then a strange thing happened. As the driver of the Rolls-Royce prepared to start his car with the change of lights, Grace distinctly saw the shadow of Molly's superbly Molly slip his arm casually and possessively about her. As Molly turned to his high, a smile came over her face, while Grace stood rooted to the spot in amazement.

(To Be Continued.)

Chew and Grow Thin

You know that certain foods furnish body energy without adding uncomfortable fat.

Sugar is one of these foods. Supplying needed energy in concentrated form.

WHIGLEY'S gives you sugar and flavor. These ingredients dissolve in your mouth.

What pleasant way of taking sugar?

Find the meat with WHIGLEY'S and stay thin.

Throw On Unusual Fare

Australian Flies like Good Food

For Sheep

James R. Ross, owner of Ural Park sheep station, on the Murrumbidgee River, Australia, in what is known as the Riverina District, has achieved success in feeding his sheep rich.

The district had experienced a long dry spell, and the stock had been able to get next to nothing of the paddocks. Mr. Ross had been feeding 3,000 merino haggas on maize and oats, eventually getting them to try rice. For several weeks, until the drought broke, the sheep were given half a pound of rice five days a week, and on Mondays and Thursdays they were fed on wheat hay.

The sheep thrived on the unusual fare, and are in excellent condition.

Internally and Externally It Is Good.—The crowning glory of Dr. Thomas' Electric Oil is that it can be used internally for many complaints, as well as externally.

For sore throat, croup, whooping cough, pain in the chest, colds and many kinds of aches and pains, it is unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

German People Favor Canada

Believe Dominion Has Best Working Conditions For Immigrants

Western Canada is an excellent country to come to, for not only are working conditions better than elsewhere, but the new immigrant may get a start on the soil at a very low cost, said Kurt Martin, new German consul at the four western ports, speaking in Regina before members of various German societies.

Mr. Martin said that Germany had no definite immigration policy and though her people were encouraged to go to the United States, many preferred Canada where friends had "made good."

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

Ancient Tree Destroyed

Five-Hundred-Year-Old Elm In England Had Dried Up For Years

An elm tree 500 years old, at Hadley Wood, Barnet, under which Bishop Latimer preached in 1535, has been destroyed by fire. The blaze started among dead leaves in a cavity in the trunk. The tree, which was of enormous girth, was said to have been one of the largest elms in the country. Henry VIII, when on his way from Hatfield House to London, heard Bishop Latimer preaching under it.

Her Little Boy Was Very Ill With Summer Complaint

Mrs. Ray Fisher, Lebert, Sask., writes:—"For over a month, last summer, my little boy was suffering from summer complaint. He got no sleep, and he was so weak he could not stand up. A neighbor recommended 'D'Fowler's Wild Strawberry' and I bought a bottle, not expecting any more benefit than from the many other medicines I had used, but to my surprise, after I had taken a few doses and before the bottle was half used, he was before his old self."

Britain's Atlantic Fleet

Finest Naval Unit In Existence and Largest In World

The Atlantic fleet becomes the greatest single fighting force in the world by the decision of the admiralty to recall five battleships of the Queen Elizabeth class from Mediterranean waters to home ports and the Atlantic fleet.

The transference of the battleships, not only an important change in distribution of the navy, but an entirely new departure in British naval policy, means the balance of power is removed from Malta and Gibraltar to the Atlantic.

The Atlantic fleet will consist of 14 capital ships, among them the two most powerful vessels in the world, the Rodney and Nelson, and the largest battle cruiser in the world, H.M.S. Hood.

The Queen Elizabeth vessels are approximately 30,000 tons, armed with eight 15-inch guns. These five will join the two Nelson class vessels, the Hood, the four Iron Duke battleships, and the battle cruisers Renown and Repulse, to make the most formidable fleet assembled on peace time duty in the world.

Officially the lack of adequate harbor accommodation is the reason for removal of the battleships. But there is more behind the decision than a mere question of details. One suggestion is that the Admiralty is influenced by the fact that these big ships will now give the British dockyards a great deal of maintenance work to compensate for the loss by reduction of the replacement program.

The Atlantic fleet in the Mediterranean will be cut to five capital ships and four of the newest "Washington" 10,000-ton cruisers.

Little Helps For This Week

"And the Lord shall help them, and deliver them, because they trust in Him."—Psalm xxxviii. 40.

Be courteous in thy faith, for not malignity is the reward to the Faithful; they are sown and rooted for their rain.

Prayer thoughts are as thine own; nor are his ways Other than thine, but by thy loftier Self of beauty infinite and love intense.

One day beyond all thought of prayer, we may crown thee with our prayers—George Macdonald.

Have faith in God, think noble thoughts, be sure that they are the righteous God means the ultimate triumph of good over evil.

—Frederic W. Farrar.

Stop Colds with Minard's Liniment.

Owns Property In New York

Valuable Real Estate Is Held By King George

Among the owners of valuable real estate in New York is King George V. of England. It is revealed by the Associated Press. Several Third Avenue sites and plots of land elsewhere in Manhattan Island, are held by the British crown.

Among them is reported to be the site of the new city hall, of the shore store which has the "largest round window in the world"—a cylindrical shaft of glass completely encircling a showcase floor which is lowered like an elevator to the basement to be trimmed and then lifted again hydraulically into place.

All the properties of the British monarch are in the custody of a holding and management corporation downtown. It frequently adds to or disposes of this or that other realty under its care, but never makes public the owner's name, and thus keeps secret the exact locations of some of the holdings of its royal client.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Gray's Worm Expeller—an excellent remedy.

Can Be Relied On

The same engines and boilers which the engineers installed in the "Mauretania" in 1907, drove the ship across the Atlantic on her record trip recently. The British workmen are always reliable and thorough.

Horse sense is properly much praised. But automobile sense nowadays is even a more valuable commodity.

Actress: "Did he really tell you I had taken 'fried'?"

His rival: "No, he said you were one!"

The first clock was made in the thirteenth century.

Kill that corn with Minard's Liniment.

MOST people rely on Aspirin to make short work of their headaches, but did you know it's just as effective in the worse pains from neuralgia or neuritis? Rheumatic pains, too. Don't suffer when aspirin can bring such complete comfort without delay, and without harm; it does not affect the heart. In every package of Aspirin you will find proven directions with which everyone should be familiar, for they can spare much needless suffering.

Aspirin

Aspirin is a Trademark Registered in Canada

Big Job Ahead

One Man Starts Work On Millions Of Books In British Museum

One lone man is working on the job of renovating the 20,000,000 books in the British Museum in London. For the past fourteen years he has been rehabilitating the dusty volumes in this world famous museum, and there are now 15,700,000 more to fix. If his present rate of progress continues, he will complete the task in just 1,520 more years—unless somebody publishes another book in the meantime.

SAVE THE CHILDREN

In Summer When Childhood Illnesses are Most Dangerous

Mother who keeps a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera, infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles. If given occasionally to the well child they will prevent their coming on. The tablets are guaranteed to be absolutely harmless even to the new-born babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Creditable Record

A Sussex lady who recently celebrated her hundredth birthday received a message from the British Red Cross Society for her War services which included sewing over 400 shirts for the men at the Front.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old. He weighs 23 pounds. I have given your medicine before each of them was born and have certainly received great benefits from it. I urge you to give it to me as I am sure they will receive the same help. I did."

—Mrs. M. M. McMillan, Venues, Ontario.

Lydia E. Pinkham's Vegetable Compound

For Troubles Due to Acid Stomach, Indigestion, Headache, Nervousness, etc.

When Food Sour

PHILIPS' MILK OF MAGNETA

For Troubles Due to Acid Stomach, Indigestion, Headache, Nervousness, etc.

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes the excess acid. The way to correct it is with an alkali, which neutralizes the excess acid. The way to correct it is with an alkali, which neutralizes the excess acid.

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come in minutes. It is the approved method. You will never use another when you know.

It is the safe method. The genuine Philips' Milk of Magnesia prescribed by physicians for 50 years in correcting acid conditions. Each bottle contains full directions—any druggist.

Clouds are sometimes ten miles thick.

Sunshine and Showers—New Version

Over ninety thousand dollars have been spent on each of the new "Sunshine" cars designed for use on the long-distance all sleeping train of the Canadian Pacific Railway. Fifteen of them have been built at the Company's Shops at Montreal, and the one pictured above, the River Thames, will be one of those in use on the Trans

Canada Limited. These cars are given over entirely to the comfort of the passengers and contain, among other things, two green-tinted "solarium" baths, a ladies lounge, a large smoking-room, an observation lounge and a Solarium. This latter, which takes the place of the open platform is glassed with vitreous which admits all the beneficial sun rays, and permits an unbroken

About Town and Country

Alex. R. McFarish, Sight Specialist, will make his regular monthly visit to the hotel at Oyen, Thursday, September 12. Better eyesight service at better prices.

Miss Helen Pope, who has been spending her holidays with her parents, Mr. and Mrs. Fred Pope of Haven, returned to Calgary early this week.

Mr. Thomas Lees and his four sons, Bob, Andrew, Jimmy and Tommy left last Friday by auto en route to Banff, to attend the annual Highland Gathering and Scottish Music Festival and the 40th annual Dominion track and field championships meet.

Mr. and Mrs. F. J. Goldsmith and daughter Joan and Miss Craig, were Oyen visitors last Wednesday evening and Thursday morning while en route to their home in Breckenburg, Sask., after spending a holiday at the mountain resorts.

The return ball game between Hanna and Oyen, scheduled to take place in Oyen last Sunday afternoon, was called off, the Hanna team being unable to get here.

Mrs. J. C. Deso, accompanied by her grandson, Roland Hancock, left last Friday morning for Edmonton. Mrs. Deso will remain in the city for a few days to visit her daughter, Mrs. H. Hancock.

Motorists who are found driving their cars without a driver's license are to be prosecuted. Instructions have been sent out to all P.P. to take proceedings against all offenders. Two months having elapsed since automobile drivers were to carry their license "cards", it is figured in official circles that sufficient leniency has been shown and the endurance limit reached.

Here and There

Honorable George, aged ten, and Honorable John, aged six, sons of Canada's ranching peer, Lord Rodner and descendants of a famous British Admiral, recently travelled 1,000 miles from Port Saskatchewan, Alta., to Banff, to enter a public school in the Old Country. They took the old journey unaccompanied, travelling on Canadian Pacific lines. In St. Montclair, C. P. R. officials looked after them on the long trip.

Hon. L. C. M. S. Amery, secretary for the Dominion in the Baldwin administration, who arrived in Canada on the Express of Australia recently travelled straight across the Dominion by Trans-Canada limited, track, Canadian Pacific flyer, for Banff and Lake Louise where he reached his objective and namesake, 11,000-foot peak where he will climb.

Miss Georgia Englishard, daughter of a New York lawyer, is busy scaling peaks and establishing climbing records around Lake Louise. She climbed six peaks up to 12,000 feet in height around Lake O'Hara in one week. In addition to these exploits she has made a three weeks pack train trip.

Adding to an imposing list of winnings gained at leading exhibitions over the prize circuit earlier in the season, the championship Hottelien herd of the Canadian Pacific Railway supply at Strathmore Park gathered ten firsts, five seconds, five thirds at the Vancouver Fair, made a clean sweep in the bull classes with junior and reserve senior championships in female classes and in group classes won first for exhibitors, first for young herd, first for progeny of cow, second in breeders herd and second in get of sire.

Judges of piping and dancing at the forthcoming Banff Highland Gathering and Scottish music festival to be held August 30, September 1 and 2 have been announced. They are: Colonel Alexander Fraser, Donald E. MacFarlane, Murdoch McLeod, George Murray, all of Toronto; William Foreman, of North Bay; Neil Sutherland, of Regina; and Alexander Hodge of Medicine Hat. Coincident with the festival, the Dominion Field and Track championships will be decided at Banff Labor Day.

Output of creamery butter in Saskatchewan for the first six months of the year is exactly 45% greater than for the similar period in 1928, according to a report of the dairy branch of the provincial department of Agriculture. In the first half of 1929 it was 4,128,044 as against 4,115,749 pounds in the first half of 1928.

The Canadian Pacific Railway will be represented at Rail Exhibitions in Eastern Canada this year at Toronto, Quebec, Sherbrooke, Regina and Fredericton by means of the system's scenic, hotel, railway and general details of the company's travel, express and telegraph facilities. There will be a special building devoted to C. P. R. matters at the Toronto Exhibition. Exhibitors activities, besides with other parts of the country will be shown at other cities. A number of special trains will be run to these Exhibitions.
